## Omni-Bot Quick Start Guide for ET

Version 3.1

762, Tuesday 22 November 2005 - 00:01:32

The recommended way to automatically add/delete bots, especially for dedicated servers, is to use minbots/maxbots from the et\_autoexec.gm script file Located here:

"C:\Program Files\Omni-Bot\et\scripts\et\_autoexec.gm"

uncomment from the following lines:

```
//MinBots(2);  
//MaxBots(12);
```

Additionally, these functions can be put in map scripts to have specific per-map min/max bots.

You can use minbots/maxbots directly from the console like '/bot minbots 2' this will only be active until the next map change. If you want to set minbots/maxbots for a whole campaign, uncomment the MinBots/Max/Bots lines in your et\_autoexec.gm file.
